

# INTER-COMPANY ACCOUNTING

**AUTOMATE FINANCIAL REPORTING, VENDOR PAYMENTS, CASH MANAGEMENT, AND INTER-COMPANY GOODS TRANSFERS ACROSS MULTIPLE RELATED COMPANIES**

Track financials and create reports for an unlimited number of related companies within your organization. Related companies can share charts of accounts, calendars, currencies, and non-financial data. Acumatica system integration manages inter-company payments in Accounts Payable (AP), centralized invoicing in Accounts Receivable (AR), inter-company journal transactions, inter-company goods transfers, company-specific cash accounts, and more.

### KEY FEATURES OF INTER-COMPANY ACCOUNTING

- **Company-based reporting.** Maintain individual ledgers for each company. You can eliminate inter-company transactions automatically when reporting across multiple companies.
- **Centralized payments.** Let companies purchase goods and services that are approved and paid for by other companies. Generate profitability reports that reflect the purchase at the company level.
- **Centralized invoicing.** Initiate sales orders from one company that are invoiced and collected by a centralized accounting team from a different company.
- **Inventory assignment.** Assign warehouses and inventory to specific companies. Inventory transfers initiate inter-company transfers to preserve company-level reporting.
